Hi! I'm Berkay. I am a Computer Engineering Student at Kocaeli University. Until now, I worked on topics such as web development, android development, machine learning, artificial neural network. I learned C and Java programming languages at the university and had the opportunity to develop many projects in these languages. I also developed different kinds of mobile applications with the react native framework. I made front-end and back-end developments. I gained experience in languages and technologies such as C#, Asp.Net, Vue.js, Bootstrap, Html, CSS. I also developed my website using the Python language and Django framework. I am a determined person who loves to learn new information all the time. And I am someone who never gives up.
